CONDITIONS AT BULLION BECK.

Examines the Property.

AJAX WAS MUCH STRONGER. WILL SINK BELOW THE 1600.

Queen of Sheba to Resume-Quincy Dividend-World's Richest. Gold Belt.

Manager P. T. Farnsworth returned a day or two ago from the Bullion Beck of Eureka, after making a thorough examination of the property. In a conversation today Mr. Farnsworth said he had not given up hope of finding another pay chute, though at the present time nothing very big is in sight. A force of about 70 men is employed in prospecting on the different levels and some very good ore is being exposed, which is in rather small bodies, however. The mine has not paid the expenses during the present year but a change is confidently looked for in the near future.

The principal work being done consists of sinking a winze from the 1,600 and running south on the 800 and 900 The winze from the 1,600 is be ing put down some distance north of shaft in a small body of ore. low grade copper ore is being found on the 800 and 900 levels but the bulk of the ore being exposed is a little too low grade to ship. Some upraising is being done in Muldoon ground from the 500 level, but the expected ore body has not yet been found.

Galena Shipment.

Latest advices from the Galena of Fish Springs state that the ore body in the winze below the 600 level is still holding out. It has now been followed down about 100 feet. Manager Joseph stated today that the work of driving on the 600 level to get under the old workings is progressing satisfactorily, and nice showings of ore are exposed in several places in the mine. Another car of ore is expected on the market next week

Queen of Sheba to Resume.

Ed Rooklidge has gone to Deep Creek country to inspect the Queen of Sheba with the view of resuming operations in the near future. The property has been closed down since last spring. when an accident occurred to the machinery. At that time several small bars of gold bullion were run out and it is expected that the mill will be started up as soon as certain changes are effected. The property is said to be one of much promise, having enough free gold ore of good quality to run the mill for an indefinite period. In addition, at the mill there is fine water power sufficient for all operations.

Start Work on Sioux-Utah.

Col. E. A. Wall returned from Tintic last evening after spending a couple of days at the Sioux-Utah property which he has just bonded. The colonel was accompanied to Tintic by George Hannahs, of Bingham, who has been placed in charge of the prospecting campaign which has been inaugurated at the above property. A force of five or six men have been put to work at two promising places in the Sioux and Utah tunnels. Inclines will be sunk Utah tunnels. Inclines will be sunk on the vein which is twenty feet wide

Anent Quincy Dividend.

When asked in reference to the Quincy dividend today Director Henry Newell, of the Quincy, of Park City, stated that he knew of no meeting of the directors this month, but he would not say whether a dividend of \$1 per share had been declared on the capital stock of 125,000 shares as reported. The dividend for last month was 50 cents a share, or \$62,500, but if the report is true the company has decided to double up this month and thus pay the largest monthly dividend of any mine in the

World's Richest Mineral Belt. The largest and richest mineral belt in the world lies on the western side

of this continent, says the San Fran-cisco Chronicle. With the exception of one section in northern Mexico and another in British Columbia, this wonderother in British Columbia, this wongerful producer of metallic wealth lies chiefly within territory over which the jurisdiction of the United States extends. In the latter, the belt embraces the states of California, Colorado, Idaho,, Montana, Nevada, Utah, Washington and Wyoming and the territories of Nevada, New Mexico and Alaska. The annual mineral output of the belt north of the Mexican boundary line ag-gregates in round numbers \$230,000,000 This constitutes, of course, only about one-sixth of the total mineral production of the United States, which amounted last year to nearly \$1,366,000,-It represents, nevertheless, the results of the labors of a comparatively small proportion of the workers engaged in the mining industry of the United States, the major part of whom are employed in coal and iron mining. The western mineral belt, which extends continuously for over 4,000 miles in length, with an average width of at least 500 miles, is as yet imperfectly developed and sparsely settled. Its wealth is varied, the precious metals occupying, of course, the leading place in the list of its products.

MINING NOTES.

The Uncle Sam of Tintic has six cars of ore on the way to market.

Manager Grier of the Homestake mine in South Dakota is in the city. Reed and Higginson of Wells, Nev. had a car of ore on the market today.

A car of ore was on the market today from the Golden Charlot near Nampa, Idaho.

Fred Mitchell expects to leave in a day or two for the Tonapah gold field in Nevada. Some of the Utah oil men are trying

to effect a combination of interests, similar to that in Wyoming. The Taylor-Brunton sampler reported

four cars of ore from Tintic, one from Nevada, and one from Idaho today. The Carisa of Tintic had four more cars of ore on the market today, making eight cars for the present week,

P. J. Donahue reports the New Sen-

looking fine in the winze below the The Lower Mammoth shaft is down 940 feet. Some encouraging develop-ments are reported in the west fissure No action was taken on the Sacra-mento dividend today owing to the absence of Glen R. Bothwell, who is at the mine.

AND UNDOWNERS OF THE PROPERTY OF THE PROPERTY

A dispatch was received from the East this morning stating that Dr. P. A. H. Franklin was in Buffalo, N. Y., on his way to Boston.

At a depth of less than 20 feet from the surface a 12 inch streak of carbon-ate ore has been uncovered in the Nancy Hanks property in Bingham. In an article in the Engineering and Mining Journal on the present condi-tion of the petroleum industry in Cali-fornia, W. G. Young deals with the big drop in prices, owing to overproduction In some places, he says, oil sold as low

The recent drop in California is said to have been caused by the heavy per centage of zinc in the recent shipmen of high grade ore. Its shipment is said to have been a mistake. The company has some high grade ore but careful sorting is necessary to get a clean lot

as 20 cents per barrel.

A dispatch received from the Sivirijoa Mining company's property in Mexico states that two 60-horse power boilers have arrived at the mine with two Cameron pumps and a hoist. The company will now proceed to pump out the old mine which has been full of water for over 100 years.

Beaver Clipper: An excellent quality of galena ore has just been struck in the Savage mine at the head of Ele phant canyon, which is now being operated by A. B. Lewis, Chas. S. Price being our townsman being in charge, which means intelligent development. The Savage bids fair to be one of the "big ones" of the State.

The Utah Crystal Oil company filed articles of incorporation in the office of the county clerk yesterday. The capital stock is \$25,000, divided into 500,000 shares of the par value of 5 cents each. N. B. Campbell is president of the company, A. H. Meredith secretary and The company owns 32 oil treasurer. locations in Utah county.

Some rocks that were picked up about fifteen miles west from Colonia Juarez, and assayed recently showed gold, in paying quantities, says the Chihuahua. (Mex.), El Progress. They came from the porphyry belt between here and the head of the San Pedro, and show that there is a country west of here quite similar to the Dos Cabezas camp. More careful prospecting will be done in the near future.

The Katharine Hope Mining company has filed articles of incorporation with the county clerk. The capital stock is \$500,000, in shares of the par value of \$1 each. The officers are: C. A. Nichison, president: Milo Clark, vice president: John Sullivan, manager, and H J. Dininny secretary and treasurer. These, with S. H. Lewis, form the directorate. The company owns a tract of mineral land on Antelope island, in section 32, township 3 north, range 3

Charlie Gulbransen this morning received a letter from his brother, who is working at the Silver Star mine, located above the California in Thayne's can yon, Park City district, in which he says that the shaft has reached a depth of 145 feet and is on a well defined its sure vein of carbonate ore. The ore is low-grade as yet, but the owners feel confident that as further depth is attained the ore will become richer. A new bunk house has been erected and work has been commenced upon the shaft house. Four men are at work in the mine and this force will be increased as sono as practicable

BANANAS FREE FOR ASKING Great Feast in Jersey City and a Slump in the Market.

Bananas were given away in Jersey City last week and half of the Italian peddlers with a stock for sale on hand went broke. There was joy, though, in the Italian quarters, for with bananas going free there wouldn't be any lack of food, and all the Italians who didn t keep fruit stands hoped that the good time would last forever.

But it only lasted for a day. It hap-pened that the Lackawana railroad had a dozen carloads of the fruit thrown on its hands. For some reason the consignees refused to accept it, and as the railroad didn't want any bananas and the frieght handlers couldn't eat all there were in the twelve cars word was sent around through all the shanties in "the Horseshoe" to come around

and have a feast. It wasn't long before the railroad yard was crowded with men, women and children seeking bananas. Some of the more enterprising brought push arts and wagons with a view of getting all in sight and making a profit n it afterward, but that didn't go.

The railroad men who distributed the fruit recognized basket bearers only and everybody got a fair deal. Italians in New York heard of the distribution, and swarmed across the river received a share, with the result that there was serious slump in the banana market on West street.

Long after the last carload had vanished before the demands upon it crowds waited around the railroad yard, hoping against hope for more. But no other dealers refused consignments, and many of those who waited had to go home at last unsupplied .-New York Sun.

SINCE KIPLING WROTE.

Skipper Desc fbes .. nd of Law to the Norva of 53.

In one of his poems Rudyard Kipling takes occasion to say "there is n law of God or man north of 53." Fa be it from a humble sailor to contra dict a great imperial poet, but the captain of the steamer Homer reports dispensation since Rudyard wrote his rhymes.

Ounalaska is between the fifty-third and fifty-fourth parallels of latitude. The United States commissioner at that place is R. H. Whipple, who from reports is carrying things with a high hand in the territory over which his jurisdiction extends. Captain Don-

aldson tells the story.

"Whipple is a protege of Judge Noyes," said the skipper of the Homer, "and he has adopted many of the Nome jurist's methods, He appointed a man named J. Sullivan as marshal and Sullivan let no opportunity go by to make an arrest. The trading comanies in the north conduct big stores and supply depots at Ounalaska, and in he spring rush many men are north to handle the cargoes of the vessels. Sullivan watched these men closely. On the slightest pretext they we parrested and taken before Judge Whipple. The filmes for the alleged offenses ranged from \$5 to \$10, but the court estimated its expenses in each case from \$25 to \$50, and the convicted man was

compelled to pay It. The marshal was energetic, and the judge convened his court sometimes four or five times a day. All the men were needed by the trading companies and rather than have them remain is jail the trading companies and ship masters paid the fines and costs." The court and its marshal seem to believe their system beats gold mining.

At the Opening There Was a Uniform Rice of a Fraction in Prices of Stocks.

Were Not Well Maintained - Large Buying of Amalgamated Copper-Demand for Pacifics.

New York, Aug. 28 .- There was a uniform rise of a small fraction in opening prices of stocks. Trading was quiet. Efforts to force a renewal of yesterday's liquidation did not meet with such success although the losses in some cases approximated a point. Prices generally returned to the opening level, but were not well maintained. Western and Pacific stocks were in better demand and there was large buying of Amalgamated Copper and Eries which infused firmness throughout the entire list. Union Pacific, Atchison and St. Paul were about a point over last night. United States Steel rose %. International Power was active and 2% higher, Bonds were firm. A decrease in buying demand resulted in price recessions but offerings were withheld before the reaction had run

steady. A quick decline of over a point each in Atchison preferred and Texas & Pacific caused more abundant offerings elsewhere and the market fell off. Prices soon hardened again when the Pacifics showed signs of improvement. The United States Leather stocks rose point each. Business generally was

far and the market became dull and

SHOOK HANDS WITH THE COOK.

Maitre Labori, Dreyfus' famous attorney, who has been visiting London, has given his friends since his return to Paris an amusing account of the dinners and suppers eaten in his hon-or. But the episode that pleased him

most of all was of a different sort. At a dinner with Lady Burdett-Coutts he congratulated the hostess on its ex-The hostess gave the glory where it was due-to the cook, who, she said, was a Frenchman and had taken special pains to please the de-fender of Dreyfus. Labori was much delighted, and at his request, the white-capped, white-aproned disposer digestions of men was summoned to the dinner table to shake hands with the distinguished guest .-Chicago News.

JAPAN SEES THE GOOD OF IT She is Just Beginning to Realize the Wisdon of Welcoming Tourists.

The Japanese are just beginning to realize that it is a good thing for their little empt.c to have it visited by crowds of tourists," said an English traveler, who is on his way back to England. The statistics regarding tour ists for last year have just been given The number of visitors who re mained any considerable length of time in Japan is given as 20,900. This is said to be 20 per cent below the number of visitors in 1899. The diminuition is supposed to de due to the war in China.
"The Japanese officials estimate that

each tourist spends an average of 1,000 yen. This means that Japan received over 20 million yen from visitors last year, an important source of revenue in so small a country. I would not be surprised to hear of the appointment of a 'press agent of Japan,' who would be responsible to the government for the proper advertising of the country's charms. For a number of years private persons of wealth who are interested in the development of the country have supported a welcome society, which does excellent work in securing passes, passports and permits to travel in the interior and otherwise looks after the comfort of foreign visitors.

"If the government ever appoints a press agent one of the first things he must do is to secure a modification of the military regulation regarding photography. Of course, they have every right to prevent visitors from photographing fortifications, but it is strainng the point to make it a crime to take a photograph within ten miles of fort. Every other tourist one meets in the East carries a camera of some They take great enjoyment making pictures of everything in sight and resent the restrictions placed up-on them."—New York Tribune.

FOR TRAVELERS

MODERATE MEANS

The through tourist sleeping-> cars which leave Salt Lake City every Wednesday and Friday for Omaha, Chicago, Kansas City. and St. Louis, are just the thing for travelers of moderate means. They are clean and comfortable, and berth rates are less than half those charged in standard

sleepers. For example: The cost of a berth, Salt Lake to Chicago or St. Louis, is only \$4. Ticket, berths, and informa-

tion at this office; or, see your local ticket agent.

Rock Island Inaugurates Fast

. Train Service

COLORADO TO CHICAGO.

On June 18th, the Rock Island will establish "One Night Out" train service, Denver and Colorado Springs to Chicago. Trains will leave Denver daily at 1:15 p. m., Colorado Springs at 1:30 p. m., arriving at Omaha at 6:06 a. m., and Chicago at 7:00 p. m. Connections made at Omaha with connecting lines for Minneapolis and St. Paul. The equipment of this train will be up to date in every way, containing all modern improvements both for comfort and safety, and will consist of composite library car, sleeper, chair car and diner. The high class service of this "One Night Out" Rock Island train together with the exceedingly low rates to the East in effect on that road heaven. with the exceedingly low rates to the East in effect on that road beginning June 20th, will insure a most liberal

patronage.
